transformed lives, changed communities

# the gift of education

**In developing countries, the impact education has on a child or a family is astounding.**

The cycle of poverty can be broken through generous and dedicated donors – like you. Your sponsorship lifts up hardworking parents who want the same things you want for children: hope, health, and a bright future.

Your gift may seem like a small thing, but it is the spark that ignites total community transformation.

There are children waiting for the gift of education across the IN network!

# one child

option 1: \$38 a month supports one child

One Child allows you to support a child who is waiting for education.

One Child embraces vulnerable children within high-risk communities. When you choose One Child, your \$38 a month pays for education, food, health care, and so much more. It changes a child's trajectory, freeing him or her from the grip of generational poverty, fueling the transition from hopelessness to hopefulness.

You introduce the highest hope that anyone could ask for as children and their families meet Jesus through your support.

Scan the QR code to support one child, one chance today!

Meeting the child we support!

“It was really amazing to meet some of the kids who had been sponsored growing up and to see them as adults and the businesses that they had set up. We had joy as we got to see a glimpse of the future for our sponsor child.”

-John & Sharon Kelsall

# one chance

option 2: your monthly gift supports one community

Now you have a chance to collectively give the gift of education for a group of children.

Many children in poverty have one chance to receive clean water, food, and medicine. One chance to be rescued from sex trafficking, liberated from child slavery, or protected from early childhood marriage.

Your support is combined with other donors to ensure every child receives an education. Fewer children are left out and more children will experience freedom. There is no time to waste. Your gift starts a chain reaction of hope.

We're supporting this group with the gift of education!

We got to meet the whole family!

“More children were getting education and food - growing and being empowered. We're building and enriching an entire community.”

- Liela McClenaghan

# the gift of education is the gift of hope

**When a child can attend school, the impact is life-changing for themselves, their family, and their communities:**

Children grow up to secure **living wage jobs** that support them and their family.

The **cycle of family poverty**, bondage, labor and forced marriage can be broken.

Families in small communities **share their blessings** with each other.

**And over time...the community becomes self-sufficient and thrives.**
